New Roller Hearth Furnaces for TECHINT ITALIMPIANTI DEUTSCHLAND in Germany.

EWK EDELSTAHLWERKE WITTEN-KREFELD GmbH, has recently awarded TECHINT ITALIMPIANTI DEUTSCHLAND Düsseldorf, the contract for engineering, fabrication, erection and commissioning of one Roller Hearth Furnace for annealing with water and polymer quenching system as well for modernization of two existing Roller Hearth Furnaces located in Krefeld and two new annealing and tempering Roller Hearth Furnaces in Witten.

The furnace in Krefeld is designed for a capacity of max. 6 t/h to anneal up to 1,050 °C whilst the furnaces in Witten are designed for a capacity of max. 11 t/h to anneal up to 1,050

The order includes turn-key plants of bilateral heated Roller Hearth Furnaces equipped with LO-NO_x-Self-Recuperative-Burners, designed to run with natural gas equipped with the newest innovative combustion technology.

The complete equipment will be started up in January 2007.

Techint Technologies design and supply a wide range of equipment and services for the metals, glass and raw materials industries. For more information visit our website at www.techint-technologies.com.
