Tenova Pyromet to shine in Chinese project

Johannesburg, June 30, 2008 Leading international furnace and smelter specialist, Tenova Pyromet has been awarded a contract by the Chinese Henan Sunshine Silicon Technology Development for the design and supply of equipment for two 39 MVA silicon furnaces to be built in Henan Province, China.

The contract includes the supply of equipment from Tenova's production facility in China TIMEC (Tianjin International Modern Equipment Company Ltd) using Tenova Pyromet's design. TIMEC, based in the industrial area of Tanggu, will manufacture either the structural and technical sections of the furnace rotary drive system, with the client providing the shell of the system, as well as the furnace smokehood complete with sideskirts and doors with hydraulic cylinders, whilst the smokehood hangers are coming from South Africa.

The furnace controller is being designed and supplied by Tenova Pyromet, with the balance of the plant being designed and supplied by the client. All required signals for the furnace controller will be sent to Pyromet via Ethernet communications. Most of the electrical equipment and some mechanical equipment were procured from Chinese suppliers, making maintenance easier for the client. With the design stage complete, the project is steaming ahead with shipping and fabrication. Equipment delivery began in June, with a view to completing that phase in September 2008.

With its long and successful history of completing projects ahead of time and its vast global experience in furnace design and creation, Tenova Pyromet is confident that the final product will exceed the expectations of Henan Sunshine

Tenova Pyromet has extensive experience in the design and construction of smelting plants and furnaces, both in South Africa and internationally. Tenova designs and supplies advanced technologies, products and services for the metal and mining industries. Tenova operates close to its customers through a network of 30 companies based in 16 different countries. For more information visit our website at www.tenovagroup.com
