SUCCESSFUL START UP OF THE BAOSTEEL REVAMPED TINNING LINE FOR TECHINT. ONLY 15 DAYS OF SHUT DOWN.

Techint has successfully started up the revamped tinning line for steel strip at Baoshan Iron & Steel Co., Ltd. (Shanghai Baosteel). The goal was to increase the line's capacity up to 155.000 tpy. The revamp and up-date of Baosteel's Yichang plant adopted enhanced technological components, especially in delicate process sections, such as pre-cleaning, tin plating and tin melting. The project was completed in record time in order to reduce the shut-down of the processing line (15 days) thus limiting the losses in production.

Techint confirms its ability in revamping and modernization using state-of-the-art technologies, regardless of the difficulties of a project, such as upgrading of an existing producing plant. Techint has a competent strong team of engineers who are dedicated and flexible to follow Customers requirements and needs.

Techint Technologies design and supply a wide range of equipment and services for the metals, glass and raw materials industries. For more information visit our website at www.techint-technologies.com.
