TENOVA STRIP PROCESSING IN POLAND FOR ARCELOR MITTAL

Milan, April 2008. Tenova Strip Processing Business Unit was recently awarded a contract, by Arcelor Mittal Steel Poland: a turnkey project for a Tenova Key Technologies acid regeneration plant, and the revamping and upgrade of a pickling line in Kraków, Poland.

The acid regeneration plant, a particularly effective unit in emissions control, will implement Sprayroaster technology and latest-generation automation, for a production capacity of 7,000 liters/hour.

Tenova Key Technologies' know-how and innovative acid regeneration systems—vital in minimizing environmental impact and improving process efficiency—were major factors in the customer's choice of a solution integrating process lines and treatment plant.

Tenova can now offer a comprehensive solution for pickling plants and acid regeneration.

Tenova designs and supplies advanced technologies, products and services for the metal and mining industries. Tenova operates close to its customers through a network of 30 companies based in 16 different countries.. For more information visit our website at www.tenovagroup.com.
