Tenova to revamp a hot rolling mill in Indonesia.

Genoa, August 2008 – Tenova, through its Business Units Tenova LOI Italimpianti and Tenova Pomini, won an important new order to modernize the PT Krakatau Steel (Persero) hot rolling mill in Indonesia.

Tenova Pomini will provide the customer with a new roll grinder, revamp the grinder currently in use - through integration of the Pomini patented independent calliper - and install a Roll Shop Management System for automated management and statistical processing of production data (rolls, gaskets, bearings, wheels). Tenova LOI Italimpianti Genoa, meanwhile, will revamp a walking beam furnace and a pusher furnace to boost production capacity to 300 tons/hour, reduce consumption and upgrade the automation system. The project, won in a consortium with SMS Demag, is expected to be completed at the end of 2009 for Reheating Furnaces and end of 2010 for Grinding machines.

Tenova designs and supplies advanced technologies, products and services for the metal and mining industries. Tenova operates close to its customers through a network of 30 companies based on the 5 continents. For more information visit our website at www.tenovagroup.com.
